

# LODGING

a  SNAP! keynote

in-depth analysis of consumer behavior and perceptions

guest visitation frequency by lodging segment

hotel consumer affinity for F&B, compared with overall population

overview of the rapidly-growing home sharing segment

deep dive into operator foodservice programs

close examination of lodging operational goals and challenges

**Check out the data packed into this report.** Whether it's at a cozy bed & breakfast, luxury five-star resort, homely motel, or an Airbnb rental, most consumers have stayed at a lodging location within the past six months. Most of these guests also obtained food on-site from venues like the free-breakfast bar, room service, and even local delivery. Datassential's Lodging Keynote includes a comprehensive consumer and operator overview of numerous lodging segments, as well as insights from some of the most powerful tools in the industry, Firefly and FLAVOR. **Rest easy knowing we've got you covered.**

# LODGING: a SNAP! keynote

## Topics covered

explore the lodging visitation behavior of 1,000 consumers

- o learn which segments appeal to different guests and the frequencies of their stays
- o discover how consumers interact with lodging foodservice

analyze guest motivations, perceptions, & affinities

- o spot key behavioral differences among guests at numerous segments, including bed & breakfasts, high-end hotels, motels, rentals, and more
- o compare classic amenities like the free-breakfast bar against newer options such as micromarkets and app-driven delivery services
- o see how apartment and home rentals have affected the overall industry

discover operator goals & challenges across 7 segments

- o understand the top priorities and challenges faced by a diverse panel of operators
- o identify where outside digital delivery fits into the overall landscape
- o diagnose how COVID-19 has impacted lodging with Datassential's latest research

dive deeper with the top tools in the industry

- o examine an inclusive overview of the entire US lodging landscape with Firefly data
- o contrast the top loved/liked foods and beverages among hotel consumers against the general population with FLAVOR

## From the report

### ● CONSUMERS

**96%** of consumers visited any type of lodging location in the past six months

**84%** ordered a food or beverage item at a lodging venue in the past six months

**33%** of consumers' most recent stays utilized a hotel's loyalty program

### ● OPERATORS

**62%** offer a free-breakfast bar

**75%** regularly update their menus in some capacity

**97%** say foodservice importance will increase or stay the same in the next two years

1,000 consumers demographically  
balanced to the general population

142 lodging operators in 7  
different segments

# EDITOR'S NOTE

This Keynote Report's consumer and operator surveys were fielded in early March. A few days later, the world changed, as the World Health Organization declared a global pandemic and the Trump administration declared a national emergency, which intensified the sense of crisis around COVID-19, or "Coronavirus," and brought about widespread social distancing.

While the Coronavirus situation will have drastic, complex effects on foodservice overall and especially lodging, this report was fielded at such a time as to provide the best baseline of sentiment and attitudes toward the lodging segment. The insights are sound, based on normal, pre-crisis responses, and are well-suited to long-term planning and strategy by those trying to understand lodging operators and their customers.

A special section at the end of this report rounds up Datassential's custom research around COVID-19 since the start of the pandemic, in order to call out findings specific to the lodging industry.

# METHODOLOGY

fielded online March 2020

1,000 consumers were surveyed overall

142 lodging operators via the Datassential panel

- 17 high-end hotel/resort operators
- 71 mid-range hotel/resort operators
- 17 suites hotel operators
- 11 budget hotel operators
- 9 motel operators
- 8 boutique hotel operators
- 9 bed & breakfast operators

*full demographic info is available in the appendix*

## OBJECTIVES

- identify consumer lodging behavior and their preferences for dining options
- understand guest motivations and attitudes toward lodging at 10 specific segments
- analyze operator motivators, preferences, and challenges regarding their foodservice programs
- identify consumer appeal and operator implementation among numerous dining initiatives
- explore the current landscape with an overview that comprises every single lodging unit in the US

# Slide Legend

In addition to custom research, this report taps into Datassential's SNAP! platform. Refer to the stripe on the left side and the icon on the bottom right corner to learn the source of the slide's data.
